Portfolio

SUMMARY

Full Stack Developer specializing in AI systems and workflow automation. Expert in designing and deploying end-to-end SaaS solutions, generative AI applications, and autonomous agents that reduce operational costs and boost efficiency. Combines a deep background in optimizing complex 3D/VFX pipelines with robust full-stack skills to automate creative and business processes.

EXPERIENCE

Creative Technology Lead (AI & Automation)

SparkE Production | 04/2024 - 09/2025

- Engineered an AI-first production model by developing custom generative AI workflows for 2D/3D asset creation, accelerating content generation pipelines by 50%.
- Designed and deployed a fully automated digital asset management system, streamlining animation and rendering workflows and eliminating critical production bottlenecks.

Freelance Full Stack Developer (AI & Automation)

Fiverr / Upwork / Contra | 04/2024 - Present

- Delivered over 8 custom AI-powered SaaS solutions and automation tools for a diverse client base, achieving a 95% project success and client satisfaction rate.
- Automated complex business operations for clients using Python, Zapier, and custom APIs, resulting in an average 25% reduction in manual data processing time.

Technical Artist & Co-Founder

SparkE Production | 01/2021 - 06/2024

- Developed custom Python-based automation tools and procedural systems within Unreal Engine, increasing pipeline efficiency for VFX and real-time content delivery by 30%.
- Led technical art teams in integrating complex code and art assets, successfully delivering over 10 high-quality cinematic and real-time

projects under tight deadlines.

Full Stack Developer
Eco Hope | 06/2025 - 09/2025

- Designed and launched a full-stack donor and child profile portal using React and FastAPI, improving data accessibility and transparency for stakeholders by 40%.
- Automated key IT and data handling operations for the NGO, reducing manual administrative tasks by over 15 hours per week and ensuring data integrity.

EDUCATION

Bachelor of Science - BS, Computer Science
National University of Sciences and Technology (NUST) | 09/2015 - 06/2020

PROJECTS

Lingolernen AI German Examination Platform
Developed a serverless, multi-agent AI platform to fully automate the creation, administration, and grading of German language exams using LLMs.

Arkurz Agentic AI Learning Graph
Built an interactive learning system using Google Gemini that transforms complex subjects into structured, hierarchical node graphs with curated resources.

Automated AI Job Application Workflow
Created a complete workflow automation system that uses AI to analyze job descriptions and assemble tailored, context-aware job applications.

EasyAppGen: Web App Generator
Designed a sophisticated workflow that converts technical specifications into runnable full-stack application scaffolds, accelerating initial project setup by 80%.

AI Shot Generator
Engineered a full-stack tool that leverages NLP to parse narrative text and automatically generate structured cinematic shot lists for production teams.

Veritas Lens: AI Fact Checker
Deployed a browser extension that acts as an AI-powered co-pilot for

> critically evaluating online content and identifying misinformation in real-time.

SKILLS

AI & Machine Learning:

[Generative AI] [AI Agents Development] [LLMs Finetuning] [RAG] [Prompt Engineering] [NLP] [Vector Databases] [Langchain] [Gemini] [OpenAI] [Anthropic]

Backend & Databases:

[Python (Flask / FastAPI)] [NodeJS] [API Development (RestAPI / GraphQL)] [NoSQL (Firebase / Supabase / MongoDB)] [Serverless Architecture] [AWS (Lambda / S3)] [Cloudflare] [Google Cloud Platform]

Frontend & Web:

[JavaScript/TypeScript] [ReactJs / NextJs] [Full Stack Web Apps] [TailwindCSS] [Vite]

Automation & DevOps:

[Workflow Automation] [Tool Creation] [Git] [Python Automation] [Docker] [CLI Tools] [Automated Testing] [n8n] [Zapier]

Languages: [English (Fluent)] [German (Basic Proficiency)]

CERTIFICATIONS

> AI Agent Developer - Vanderbilt University

> RAG and Agentic AI - IBM

> Google IT Automation with Python - Google

> Docker Foundations Professional Certificate - Docker, Inc

> Career Essentials in Generative AI - Microsoft and LinkedIn

> Programming with Python Professional Certificate - OpenEDG Python Institute
